Subject: RoHS Compliance (Restrictions of Hazardous Substances 2002/95/EC)

To Whom It May Concern:

Spira Manufacturing Corporation is committed to protecting the environment, as well as, being an environmentally responsible company. Spira Manufacturing Corporation is also committed to being compliant with directive 2002/95/EC, which bans certain hazardous substances found in electronic equipment.

The materials and substances listed in the RoHS directive, which include lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB), and polybrominated diphenyl ethers (PBDE), are not intentionally added or used in the manufacturing of our RoHS compliant gaskets and seals. Spira Manufacturing Corporation does not use any of these substances listed in the RoHS directive in the manufacturing of our RoHS compliant gaskets.

Please note that possible traces equal to content in naturally occurring mined copper may exist in our beryllium copper products. However, if these traces exist, they are well below the allowable percentage listed in the RoHS directive.

As a result of this directive, Spira Manufacturing Corporation has developed a whole new Product line of RoHS compliant EMI Gaskets and seals. Please call or e-mail sales@spira-emi.com for details.

Best Regards,

Michael Kunkel
